Work Zone Application

Instructions: Please print clearly in the spaces provided.

A work zone established by the City is provided to fundamentally service a construction site for the purpose of loading and unloading material. A work zone is not to be used as parking by any individual or for storage of materials, bins or any other item.

Should the City require the work zone space for other works, a written notice to suspend the work zone will be issued to your organisation two weeks in advance. Upon completion of the other works, the work zone could be reinstated if required.

All fees must be paid and all signage must be installed by the City before the work zone becomes operational.

work zone, the on-going parking hire fees and later for the removal of the work zone. The payment method is shown on the invoice.

Work zone fees are charged as follows:

- 1. An establishment cost will be determined after an on-site inspection by the Coordinator Civil Maintenance Officer. The cost will include alterations to parking signage and any associated road marking, street furniture and infrastructure. These costs will be payable directly to the Coordinator.
- 2. Parking fees will be determined by the Customer Service Accounts Officer, which will include the cost for any ticket machine relocation and for the hire fees of parking bays. Charges will be in accordance with the current Schedule of Fees for the relevant financial year which changes annually. Accordingly, a monthly fee is charged in advanced for the usage of the road reserve for each 6.0 metre length or per car bay, as applicable. The City requires an initial payment for the first 3 months, thereafter a monthly invoice will be sent. These costs will be payable directly to the Accounts Officer.
- 3. A removal cost will be determined after an on-site inspection by the Coordinator Civil Maintenance Officer, at the time the work zone is to be removed. The cost will be payable directly to the Coordinator.
